

Quality Technician Job Description:

We are a high precision machine shop located in Brantford looking to further develop our Quality team in order to support our commitment to providing customers with precision machining solutions.

The primary role for the Quality Technician will be to inspect and audit processes and products to ensure they conform to the company's quality standards. Under the leadership of the quality manager, you will assist the organization in monitoring production and process quality levels through selective inspections and regular audits. We are a dynamic team-oriented organization and the ideal candidate should be flexible to the demands of the organization. Pride in workmanship is an absolute must for this position.

Responsibilities:

- Prepare Inspection reports for production jobs
- Program and run CMM and optical metrology equipment
- Perform daily process audits on production jobs
- Collaborate with production on continuous improvement initiatives
- Support the quality and production teams on root cause analysis and corrective and preventive action activities
- Other duties as assigned by the Quality Manager

Qualifications:

- Able to read and interpret engineering drawings with a sound knowledge of GD&T
- At least 2 years experience working in quality in a machine shop
- Able to program and run Coordinate Measuring Machines (CMM), preferably Zeiss
- Experience using optical metrology equipment such as OGP Smart Scope
- Demonstrated experience with core quality practices (root cause analysis, GR&R, auditing)
- Proficiency in the use of hand gauges
- Good communication skills with shop floor personnel and management
- Experience with Lean implementation would be considered an asset
- ASQ certification (CQT, CMI) or equivalent, is preferred
